PROFILE SUMMARY

Frontend Developer with hands-on experience building responsive, component-driven web applications using React, JavaScript, and Bootstrap. Strong problem-solving foundation with 200+ DSA problems solved in Java, including a Rank 1 finish on Code360. Experienced in API integration, state management, and UI performance, with a track record of shipping features in fast-paced hackathon and internship environments. Seeking an entry-level Frontend Developer / SDE role to apply both frontend engineering and strong DSA fundamentals.

EDUCATION

2023 - 2027 **B.Tech - Information Technology** | Panimalar Engineering College, Chennai
CGPA: 8.6/10 (Till 5th Semester)

2022 - 2023 **Class XII** | Jaigopal Garodia Matriculation Higher Secondary School, Chennai
Percentage: 90%

TECHNICAL SKILLS

Languages : Java, SQL

Frontend Development: HTML5, CSS3, JavaScript, React, Bootstrap, GSAP

Database: MySQL

Tools & Platforms: Git, GitHub, VS Code

Core Competencies: Data Structures & Algorithms (Java), Object-Oriented Programming (OOP), Responsive Web Design, Debugging & Optimization, UI Development

WORK EXPERIENCE

Frontend Intern | Oasis Infobyte

August 2025 - September 2025

- Built and shipped 5+ responsive UI components using React and Bootstrap, ensuring consistent rendering across breakpoints and browsers.
- Debugged and resolved reported UI issues during QA cycles, improving component stability ahead of release.
- Followed Git-based feature-branch workflow — created branches, opened pull requests, and incorporated review feedback before merging.
- Collaborated with team members on frontend-backend integration and applied UI/UX best practices in a production codebase.

PROJECTS

The Gourmand's Guide - Interactive Recipe Discovery Platform ([GitHub](#))

Built a responsive recipe discovery platform in React with dynamic search, category filtering, and client-side pagination. Integrated with a public recipe API to fetch and render data efficiently. Structured the UI into reusable, prop-driven components (SearchBar, FilterPanel, RecipeCard) with centralized state managed via React Hooks.

Smart Internship Recommendation System ([GitHub](#))

Developed a responsive internship recommendation platform using React and Bootstrap. Implemented reusable React components, integrated REST APIs to retrieve and display internship recommendations, managed application state with React Hooks, and optimized the user interface for responsiveness and performance across multiple devices.

ACHIEVEMENTS & CERTIFICATIONS

- Rank 1** - Code360 (College Topper, DSA)
- Solved **200+** DSA problems on LeetCode (Java)
- Winner** - 24hr Hackathon (KPR Institute, 2026)
- Runner-up** - National Hackathon (SRM Institute, 2026)
- Runner-up** - 24hr Hackathon (Pratyusha College, 2026)
- Runner-up** - 12hr Hackathon (SEC Chennai, 2025)
- SQL (Advanced) - HackerRank (2025)
- Generative AI - Oracle (2025)
