PROFILE SUMMARY

Full Stack Developer (React, FastAPI, MongoDB) with experience building scalable frontend and backend systems. Skilled in REST API development, API design, and database management, with focus on performance optimization and responsive UI development. Architected cloud-integrated and AI-powered applications, consistently reducing API response times and improving user experience. Seeking an entry-level role to develop end-to-end applications and grow technical expertise.

EDUCATION

2023 - 2027 **B.Tech - Information Technology** | Panimalar Engineering College, Chennai
CGPA: 8.6/10 (Till 5th Semester)

2022 - 2023 **Class XII** | Jaigopal Garodia Matriculation Higher Secondary School, Chennai
Percentage: 90%

TECHNICAL SKILLS

Programming Languages : Java, SQL, Python

Frontend Development: HTML, CSS, JavaScript, React, Bootstrap, GSAP (JS Library)

Backend Development: FastAPI, REST API Development

Database: MySQL, MongoDB

Tools & Platforms: Git, VS Code

Core Competencies: Data Structures and Algorithms, API Design, Debugging & Optimization

WORK EXPERIENCE

Frontend Intern | Oasis Infobyte

August 2025 - September 2025

- Developed responsive and user-friendly web pages using React and Bootstrap, improving page load consistency across 5+ components.
- Assisted in implementing interactive features, contributing to a 20% reduction in reported UI issues.
- Implemented version control best practices using Git, managing feature branches and pull requests to streamline team-based development.
- Applied frontend debugging and UI/UX best practices in a production environment.

PROJECTS

The Gourmand's Guide - Interactive Recipe Discovery Platform ([GitHub](#))

Built a full-stack recipe discovery platform using React, FastAPI, and MongoDB Atlas, enabling dynamic search, filtering, and pagination via dedicated **API endpoints**. Designed REST API architecture with optimized database queries for efficient real-time data retrieval and responsive user experience.

AuditForge (Full Stack + AI) - Offline Multi-Format Security Audit Generator ([GitHub](#))

Developed an AI-powered offline security audit system integrating a locally hosted Mistral LLM via Ollama to auto-generate structured reports from multi-format vulnerability scans (CSV, JSON, XML, TXT). Built a robust FastAPI backend with intelligent parsing, severity prioritization, and deduplication, paired with a React frontend for streamlined file upload and report visualization.

ACHIEVEMENTS & CERTIFICATIONS

- Rank 1** - Code360 (College Topper)
- Solved **100+** DSA problems on LeetCode
- Winner** - 24hr Hackathon (KPR Institute, 2026)
- Runner-up** - National Hackathon (SRM Institute, 2026)
- Runner-up** - 24hr Hackathon (Pratyusha College, 2026)
- Runner-up** - 12hr Hackathon (SEC Chennai, 2025)
- SQL (Advanced) - HackerRank (2025)
- Generative AI - Oracle (2025)
- Certificate of Merit – Naukri Campus Young Turks (2025)
